

Beginning with Model Year 2010, a 3-dimensional (3D) image of selected components in the Service Parts List is available. This 3D image will be displayed in a separate window and can be rotated to see all sides, top and bottom. Note that not all components are available and some components, like decals, will only show an outline of the shape of the component.

In order to view the 3D image, you need to do a one-time installation of the JT2GO software. A button has been placed on the main Service Parts List window (see Figure 1) for easy installation of the software.

To install the software, click on the  button (1). This will download and install the JT2GO software. Use the default setup options when installing. The first time you view a 3D image, you will get a registration screen. If you do not wish to register, you may skip this registration process. Note that you must have administrator rights on your computer to install the JT2GO software.

The screenshot shows the Winnebago Service Parts List interface. At the top center is the Winnebago Industries logo. To its right is the title "Service Parts List" in red. Below the logo, a search instruction reads: "To find a given motor home, please choose the year, type in unit Serial Number, and click on Search." Underneath, there is a "Select Model Year" section with radio buttons for years 2001 through 2010. Below that is a search form with the label "Enter 5 Digit Serial Number:", a text input field, a "Search" button, and a "Clear" button. A red arrow labeled "3" points to the "Search" button. Another red arrow labeled "2" points to the "2010" radio button. At the bottom left, there is a button labeled "JT2GoSetup" with a small icon, and a red arrow labeled "1" points to it. Below the search form, there is a list of error messages: "If you receive an invalid URL screen after doing a search, it is due to one of the following:" followed by three numbered items: "1. Serial Number of unit is invalid.", "2. Serial Number is valid but the incorrect year is chosen.", and "3. Service Parts List for a given unit Serial Number has not been created yet." At the bottom of the page, there is a footer with the text: "[Click the above button to download and install the free JT2GO program to your Windows (XP or Vista) based computer (You must have Admin rights to install). This program will allow you to view a 3D model of selected parts.]" and "Copyright © 2009 Winnebago Industries, Inc."

Figure 1

When you access the Service Parts List webpage (See Figure 1), the model year (2) and last 5 digits of the unit serial number (3) are entered as usual. Once the “Search” button is pressed, you will see your unit document (See Figure 2). There are several items to note at this point:

- The “MFG DATE” for this unit is now displayed at each page break (4).
- The unit interior Color Code is listed (5).
- There is a list of all factory installed optional features this unit is built with (6).
- There is a paragraph briefly explaining JT2Go with a link that opens the previous menu (in a separate window) to access the JT2GoSetup button (7).
- Within the parts listing, some part numbers are displayed in color (usually blue) and underlined (8). This indicates the part is available for viewing in the JT2Go system.

WINNEBAGO SERVICE PART ALPHA LIST  
10L65000 WDH25T MFG DATE: 08/11/09

OPT	DESC	OPT	DESC
AN6	BOMBAY/TAUPE/SUNSET CHERRY	094	WINDOWS - SE-GI
23T	DRAINAGE SYSTEM-HEATED	24P	MASK FRONT EXT PROTECTIVE
29B	WATER PURIFIER	29P	AC HEAT PUMP-HI EFF, LOW PFL
45K	FLEX BED KIT	48E	POWER VENTILATOR-BATH
48Q	SATELLITE TV SYSTEM MANUAL	54W	WHEELS-STYLIZED ALUMINUM

Figure 2

To view the 3D image, just click on a linked Part Number. The following screen will appear (see Figure 3). If you uncheck the “Always ask before opening this type of file” box (1) it will skip this step in the future. Click “Open” (2) to continue.

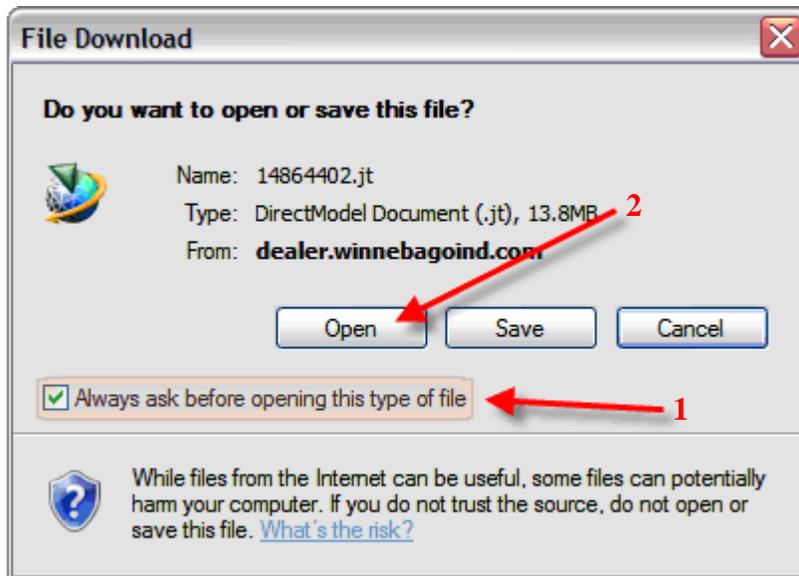

Figure 3

Once JT2GO has loaded, it will display a 3D image of the part you selected in a separate window (see Figure 4). You can rotate and maneuver this image to see all sides, top or bottom.

- » Hold the left mouse button down and move the mouse around to rotate the image
- » Hold the middle mouse button down and move the mouse to move the image
- » Use the roller ball to zoom in and out
